

# Virtual StrongBox checks all the boxes for FFIEC Risk Considerations

FFIEC Risk Considerations	File Sharing Risk	Virtual StrongBox	Other File Sharing Vendors
Security deficiencies in file exchange methods	Lack of encryption or weak encryption	✓	?
File storage on untrusted services by third-party providers	Leads to unauthorized access of stored files and unapproved copies of the files	✓	?
File traversing untrusted networks	Leads to unauthorized access	✓	?
Alteration of any file, even files without sensitive information	Leads to data integrity issues	✓	?
Solutions that are often difficult for users to set up and use	Sender and recipient needs to install software to exchange keys or files	✓	?
Use of unapproved, insecure, or ad hoc file exchange methods	Leads to shadow IT risks of data exposure	✓	?
Access to shared file repositories	Leads to version control or unauthorized access issues	✓	?
Continuous monitoring of root causes of data exposure	Leads to measures to reduce the likelihood of occurrence	✓	?
