

# Modernize your Indirect Lending Processes

## Collect Documents From Dealerships

Our digital vault platform empowers Financial Institutions to securely collect documents from third-party partners to speed up processes like auto loan and account opening applications.

Banks and Credit Unions leverage Virtual StrongBox to collect sensitive information about current or potential customers looking to purchase a vehicle.

Replace courier services and fax machines with a digital collaboration platform made for financial institutions.

### Speed

Modernize the current indirect lending process and fund loans faster.

### Secure

Our built-in virus checker ensures that upload files are safe to open.

### Simple

With one click dealers can upload loan files directly to the lending team.

### Productivity

Teams receive a notification when new documents are uploaded.

 Collect Application & Documents

## Platform Features

### Shared Workspace

Teams can organize and collect documentation in a secure central hub.

### Group Notification

Select members of your team to receive a notification when a file has been added.

### Secure Share Link

Easily collect sensitive files by enabling dealers to upload files into a dedicated folder.

### FFIEC Compliant

Our platform was made for bankers by bankers. Our security is our differentiator.
